🏠 Srirampura, 560021 Bangalore

📅 Date of birth 22/07/1995

📱 +91 72047 61907

Areas of Expertise:

- Node.JS
- MongoDB
- Web Technology-HTML5,CSS3, JavaScript
- React.JS
- Express.JS
- Good Knowledge on SDLC methodology and Agile model.

Tools:

- Version Control System tool- git bash, git hub
- Project Management tool -JIRA
- Eclipse, SQL Plus, Edit+ ,VS Code, MongoDBCompass

Languages:

English

Kannada

Hindi

Personal traits:

Honest, Problem Solving, Flexible, Team player , Self Confident

Interests:

Chess, Cricket, Reading books, Traveling, Drawing

Social networks:

in @Prajwal Kumar

CAREER OBJECTIVE:

Finding a challenging position that offers long-term growth and professional development as a software developer, where I can apply my knowledge, abilities, and leadership to significantly contribute to an organization's success.

Projects:

- **ReactJS Netflix Front Page Clone:**
  Developed a ReactJS-based Netflix Front Page Clone project by utilizing various components to recreate the UI. Implemented user navigate hooks to enhance user experience.
- **Replication of Streaming Platform Interfaces using HTML and CSS** :
  Developed ZEE5 and Netflix clone applications utilizing HTML and CSS, replicating the user interface and design elements of the original platforms.Demonstrated proficiency in front-end web development, attention to detail, and the ability to recreate user interfaces.
- **User Information Management System**:
  Developed a user information management system using ReactJS, enabling CRUD (Create, Read, Update, Delete) operations on user data stored in a JSON file.

Core Competencies:

Node.js, React.js, MongoDB, Express JS, Web Technology.

- Good understanding and practice on Node.js event-driven architecture and non-blocking I/O model for scalable server-side development. Utilizing modules and leveraging NPM to manage dependencies effectively. file system operations and creating web servers. Well-versed in connecting and interacting with MongoDB databases, enabling seamless data storage and retrieval in Node.js applications.

- Knowledge in ReactJS, proficient in Virtual DOM for efficient rendering. writing JSX components, utilizing props and states. hooks, refs, routers, and using axios for dynamic web development.

- Understanding of Mongodb and ability to build, manage, and update databases and collections. data storage and retrieval, including handling and manipulating in collections.

- Basic knowledge on Expressj.s and middlewares.

- Proficient in web technologies such as HTML, CSS, and JavaScript for front-end development. In JavaScript, proficient in variables, functions, and arrays for efficient data handling.

Professional Experience:

Procurement Executive

From December 2018 to November 2022
Al Tasnim Enterprises Limited Oman, muscat

- Proven track record of effectively managing procurement activities and achieving cost savings for the organization.
- Experience in developing and implementing procurement strategies that align with company objectives and drive operational efficiency

Maintenance Supervisor

From August 2017 to September 2018
BASF India Ltd (R&D), Managalore Managlore

- Assisted in the design and development of mechanical systems, components, and equipment according to project requirements and specifications.
- Collaborated with senior engineers and cross-functional teams to ensure timely completion of projects and adherence to quality standards.

Certification:

- **Mern Fullstack Developement** in Jspider ,Bangalore (Software Development and Training Center.)

Education

Bachelor of Engineering

From June 2013 to July 2017
Shree Devi Institute of Technology Mangalore, Karnātaka, India.
 Mechanical Engineering

Intermediate (2011-2013)

From May 2011 to June 2013
St.Aloysius College Mangalore, Karnātaka, India.
PCME
